XT 30, CT 20

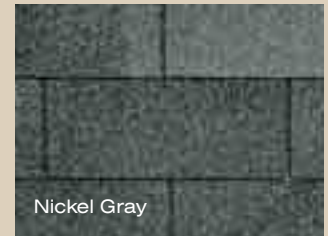

Traditional Shingles

Shown in Gray Frost

CertainTeed 
Quality made certain. Satisfaction guaranteed.™

XT 30 & CT 20 color palette

* Available in XT 30 only

two levels of protection

When it comes to weathering the elements, XT™ 30 and CT™ 20 are quite simply at the top of their class. Built on a tough fiber glass base, each shingle provides exceptional resistance to blow-off and tearing.

For just a bit more money than an ordinary shingle, XT 30 gives you a whole lot more to work with. If you want a three-tab shingle that's nailed down quality without paying the price, CT 20 is an intelligent balance of strength, reliability and value.

Both products conform to the following specifications:

- Fiber glass composition
- UL Class A fire resistance
- UL certified to meet ASTM D3462
- UL certified to meet ASTM D3018 Type 1
- Conforms to CSA standard A123.5-98

For U.S. building code compliance, see product specification sheets.

color companion products™

CertainTeed offers Flintlastic™ SA, a low-slope roofing product that goes perfectly with XT 30 and CT 20 shingles. It's available in several colors, giving you the flexibility to coordinate or match areas such as porches, canopies and carports with your main roof.
